

ASK FOR THE AUDIT.

The companies listed on this page care so much about protecting your content and copyrights that they have undergone and paid for an intensive digital and physical audit of their site's security and copyright policies and procedures. It cost them time, money, and business interruption but it made them one of the industry's most elite supply chain partners. Ask for a CDSA audit statement next time you select a vendor who will handle your company's most precious asset – your content.
